WaterLink® SpinTouch®

with **WaterLink Solutions™ SOFTWARE**

The Challenge

- Getting test results you can trust
- Relying on untrained testers for reliable results
- Preventing pool closures and negative PR
- Avoiding costly law suits & equipment failures
- Seeing real time and recording test results at all your pools & spas
The Solution

WaterLink® SpinTouch®

with **WaterLink Solutions™**

The innovative *WaterLink® Spin Touch®* photometer handles all your pool and spa testing needs and records data each moment a test is done. Simply fill a multi-test reagent disk with your water sample, insert it in the meter and tap "start." All your vital tests are done automatically, thus eliminating user-error.

Results are displayed on the touch-screen display, saved inside the meter, and easily transferred to software.

NSF CERTIFICATION

The NSF/ANSI 50 certification mark on a water quality testing device (WQTD) used in recreational waters, such as pools and spas, means that the product was reviewed and certified by NSF International to meet applicable American National Standards for product design and performance. NSF tests and re-tests products to confirm that they comply with all requirements of certification for performance, accuracy and operating range. Certification levels of L1, L2, and L3 are possible with L1 being the highest rating.

			NSF Level
Test Factor	Application	NSF Certified Range	Accuracy/ Overall
pH	Pool	6.4–8.6	L1
	Spa/Hot Tub	6.4–8.6	L1
Free Chlorine	Pool	0–15 ppm	L1
	Spa/Hot Tub	0–7 ppm	L1
Chlorine, Combined	Pool	0–1 ppm	L1
	Spa/Hot Tub	0–1 ppm	L1
Cyanuric Acid	Pool	5–50 ppm	L1

Other test factors not evaluated by NSF. Go to www.nsf.org for a current listing of LaMotte NSF certified products.

The Software

WaterLink Solutions™

Takes world's best testing system to the next level!
...and is designed for public pool operators.

- **Capture instantly date, time, test results** for every pool, spa, fountain, etc. for which you are responsible.
- **View in real time** from any internet connected device every property's body of water for which you are responsible.
- **Monitoring Dashboard alerts you** to all water bodies out of range in real time. Stores and graphically presents **complete water quality history** over any time period for all bodies of water.
- **Powerful, Customizable Treatment Engine** instantly provides dosing instructions and advice.

All Free of Charge [except Monitoring Dashboard at nominal monthly charge].

Monitoring Dashboard

Watch all your bodies of water in real-time and see color alerted out-of-range problems instantly on a consolidate dashboard.

- Review test results at a glance, shaping charts and graphs to show information relevant to you.
- Define when a test factor result should indicate it is out of range or on target.
- Test Results entered manually are flagged with a special icon.
- Graphically trend test data to easily pick out problem areas.

Test History Avoid costly pool shut downs and law suits by showing complete history of NSF approved SpinTouch test results by day for any period.

Flexible Data Management

Set up any relationships of Sites to Properties to Contacts to fit your monitoring needs. Data is divided among three simple entities—Sites, Properties, and Contacts:

Sites are bodies or water you can test.

Properties are physical locations where a Site exists.

Contacts are individuals you'd like to contact when a water test is complete.

If all you need are Sites, don't worry about the rest, but if you need, set up complex relationships between these entities.

- Manage records across three entities: Properties, Contacts, and Sites.
- Flexible linking of entities builds relationship between your data.
- Intelligent search controls help you find exactly what you are looking for.
